

I encourage you to reject NAB's petition 04-160. I make the choice to pay for satellite radio because it gives me a much wider variety of radio channels from which to choose. The additional of local traffic and weather channels is just one added benefit to satellite radio that should not be taken away from consumers. It enables me to get traffic and weather reports at my convenience, rather than having to listen to local stations just waiting for that information. I pay for this service and that choice should not be taken away because of concerns by the National Association of Broadcasters. Thank you.
